3137: CA: not considered according to Canadian policies;

3142: CA: not considered according to Canadian policies;

3143: CA: not considered according to Canadian policies;

3149: CA: not considered according to Canadian policies;

3154: CA: not considered according to Canadian policies;

3155: CA: not considered according to Canadian policies;

3160: EU: GBM 18: Potential interest but without information about the realisation of such a system. No industrial collaborators. To be resubmitted with more details about realisation and with EU industrial collaborators.;

3162: EU: GBM 18 : Project of technical and economical interest that needs to be rewritten in association with industrial collaborators, taking in view the market.;CA: not considered according to Canadian policies;

3163: EU: GBM 18: The project needs to be improved with EU collaborators of industry in the field of composites. ;CA: not considered according to Canadian policies;

3164: CA: not considered according to Canadian policies;

3179: CA: not considered according to Canadian policies;

3182: CA: not considered according to Canadian policies;

3185: US: next board;CA: not considered according to Canadian policies;

3186: EU: GBM 19: Interesting project but project must be restructured. By reducing the number of partners, with better coordination, by presenting what would be the tasks. There should be more European collaborators from industry.;CA: not considered according to Canadian policies;

3188: EU: GBM 18 : rewrite with more details;

3189: EU: GBM 19 : Interesting project but detailed information explaining how the project would be conducted is required before further consideration for funding.;

3195: EU: Co-funding from European collaborators needed or enlarge European collaborators from industry.;

3204: EU: GBM 18: Interesting project but needs collaborator from industry before further consideration;CA: not considered according to Canadian policies;

3206: EU: GBM 18: Proposal needs to be improved: more details about theoretical model. Cooperation with EU to be better defined.;

3209: US: R&R paragraph: the proposal was judged eligible for R&R. However, there is no guarantee as regards future possible funding. Authors need to work together with the collaborator(s) to revise and resubmit this proposal. They need to answer the questions raised by the reviewers thoroughly. In particular, the English needs to be improved. Once this proposal is revised, it will be considered again.;CA: not considered according to Canadian policies;

3211: CA: not considered according to Canadian policies;

3212: CA: not considered according to Canadian policies;

3213: US: needs US Collaborator;EU: GBM 18 : Interesting project that needs collaborators from industry for further consideration;

3215: EU: GBM18 : Interesting economical project that needs European industrial collaborators that could also involve themselves in co-funding;

3221: EU: GBM 19: Possible interesting project that must be reviewed and resubmitted by implying European industrial collaborators. To include corrosion testing in the project and reduce the staff. Schedule to be improved also.;

3226: EU: GBM 18 : No justification of technical choices and no comparison with other technologies;

3233: CA: not considered according to Canadian policies;

3234: EU: GBM 18 : Interesting project that needs collaborators from research agency or from industry before further consideration;

3237: CA: not considered according to Canadian policies;

3244: CA: not considered according to Canadian policies;

3249: EU: GBM 19 : interesting subject but needs more collaborators from europe, specially from industrial sector before further consideration;

3250: EU: GBM 18 : Actual subject but the proposal is too much ambitious and without collaborators from industry. To rewrite with industrial collaborators and to resubmit. ;

3258: EU: next board;CA: not considered according to Canadian policies;

3263: EU: GBM 18 : Needs to be rewritten with more detailed information about how to reach the goals and with explanation of technicals choices. Find industrial collaborators;CA: not considered according to Canadian policies;

3269: CA: not considered according to Canadian policies;

3274: CA: not considered according to Canadian policies;

3278: EU: GBM 18 : Interesting project . Project needs more participation of European collaborators before further consideration.;

3279: EU: GBM 19 : Potentially important project that needs improvements before further consideration for funding. Some funds (10k€) should be allocated in order to organize a workshop by STCU to review the workplan. Improvements should clarify the technical approach, limit the objectives, take in account the knowhow of world community on computer-codes safety and reliability.;

3282: EU: rewrite resubmit;

3284: CA: not considered according to Canadian policies;

3285: EU: GBM 18 :The proposal is badly prepared, there is a considerable number of animal tests involved, which is lacking the proof with European testing standards, could be resubmitted with improved preparation;CA: not considered according to Canadian policies;

3286: EU: rewrite resubmit;

3287: CA: not considered according to Canadian policies;

3290: EU: GBM 18: The subject is relevant. The description of the project should be improved by considering the progress in Western Europe.;

3296: EU: GBM 19 : Relevant project whose redaction must be improved in collaboration with more European partners. Particularly with industrialists implied with interest on potential application. Links with European research should be established through FP6 NMP "INMAR" project.;
