For a Safer and Better World

The STCU – is an intergovernmental organization, dedicated to non-proliferation of technologies and expertise related to weapons of mass destruction, including nuclear, biological and chemical weapons, and their delivery systems.

The STCU facilitates the creation of linkages between Scientific Communities.

Since 1995, Private Companies and Government Agencies from the Funding Parties have entrusted the STCU to manage over 1,000 R&D projects, worth more than 160 million dollars.

STCU main advantages:

1. A Tax-Free Environment for local researchers' fees and for imports of equipment to Recipient Countries.
2. Unique knowledge of scientific capabilities with R&D projects financed over the past 12 years.

Funding Parties are Canada, European Union, United States.

Recipient Countries are Azerbaijan, Georgia, Moldova, Ukraine, and Uzbekistan.
